Rocket City Math League

The third annual Rocket City Math League mathematics competition will be held during the subsequent dates during the 2004 to 2005 school year. The competition will be held for FREE this year due to a benevolent grant from Mu Alpha Theta, to which we are grateful. All schools that meet the necessary requirements are welcome to participate. General information about the tests is listed below.

- There are three 45-minute tests, each with 12 questions.
  There are two levels of test, the Mercury and Apollo divisions. To participate in the Apollo division, a student must be enrolled in a Geometry or Algebra II math class during the upcoming or current school year. To participate in the Mercury division, a student must be enrolled in a Algebra I or Pre-Algebra math class during the upcoming or current school year.
- Testing dates are:
  Round one - December 6-10, 2004
  Round two - January 24-28, 2005
  Round three - March 7 -11, 2005
  Tests may be administered on any one day during the testing period.
- Each subcategory will be ranked separately for individual awards (Geometry students will be in a separate bracket from Algebra II, etc.)
- Individual and team awards will be mailed by the first of May.
- Each round of competition will be mailed to your school, where you can administer the test at the time of your choosing on the condition that it is within the allocated time interval for that round.
- For more information and for sample test, please visit www.rocketcitymath.org.

If you have any question or comment about the Rocket City Math League please send an E-mail to rcml@rocketcitymath.org.
